

Aaron Hong

FULL-STACK DEVELOPER

PROFILE

I am a full-stack developer, I have a strong understanding of the entire web development process, from designing and building frontend user interfaces to implementing backend server-side logic

EXPERIENCE

Python Developer

Guangzhou URUN Big Data Service Co.,Ltd.

2020 - 2021

- Worked with team leaders to provide valuable insights and propose innovative solutions for new and existing projects, resulting in improved project outcomes
- Created a custom API to acquire and format data from another company's API
- Wrote a Python script to automate the projection of complex data from MongoDB to MySQL, including the creation of optimized SQL queries to improve website data retrieval speeds by 300%

PERSONAL PROJECTS

Blogging platform

A blogging website where users can sign up with a username and password, create posts with a title, content, image, and tags. The homepage has a search bar for blog titles and content, and a tag list to filter blogs

aaronhong.net

A portfolio website with Home, About, Projects, and Contact sections. It supports English, Simplified Chinese, and Traditional Chinese languages and has both dark and light themes
